

## | Who are we?

NZCG is a contracting and construction consultancy business, specialised in Project Management for commercial, residential, and industrial construction projects.

## | Services portfolio.

Our in-house expertise allows us to offer a holistic and comprehensive services portfolio:

- **General contracting**, including light civil and infrastructure, earthmoving, site clearing, concrete work, material hauling, and landscaping,
- **General development management**, including planning, engineering, geotechnical investigation, and feasibility analysis,
- **Estimation and quantity surveying**, including general estimation for feasibility analysis, BoM reports, quoting, project cost monitoring, and procurement,
- **Construction project management**, including stakeholder management, concept and design management, engineering to the contract, contractors and suppliers' management, risk management, and general administration,
- **General consulting and advisory to construction projects**, including project governance, client representation, case analysis, mentorship, policy implementation, and case analysis,

**Maximum efficiency, integrity, and zeal** are our values. We uphold the belief that our clients are our partners, and we gauge our own success on theirs.

# | Our experience and team.

Our business has more than \$40m worth of completed projects in New Zealand, with further expertise being brought into the company by its directorship.

*Our combined experience* encompasses residential, commercial, and industrial projects nationwide, including infill, small to large residential developments, social housing, medium-scale commercial fitouts, renovations, industrial maintenance and resourcing, scheduled plant shutdowns, and expansion projects.

*Our team* is comprised of independent qualified **Project Managers** and **Quantity Surveyors**, mostly based in Hawke's Bay. Our director, **Paulo Baronceli** has more than 13 years' experience in the industry, is a qualified Project Manager, MBA, and RMBA, and is the main responsible for client liaising, resource allocation, and large contracts management.

# | How can we help?

We can help you to execute on any construction and engineering-related project. We often work with residential and commercial developers, industrial plant managers, and retail customers looking into subdividing their land or building.
